

Yehor Feshchenko

System Analyst · AI Integration

Kyiv, Ukraine · remote | cv@aliases.feshchenko.org | linkedin.com/in/jerzyf

Summary

- System Analyst since Sep 2023, Senior since Apr 2026
- Domains: CRM, B2B internal systems, databases, integrations
- 3.5 years of technical support and account management before analysis
- Runs a personal multi-agent LLM system daily; writes acceptance criteria for AI features

Experience

Senior System Analyst, [Lazerhouse](#)

Apr 2026 – Present

- Own requirements end to end, from elicitation and scoping to dev handoff and UAT
- Designed and own the access-management process for 9 internal systems (request, approval, provisioning, revocation)
- Analyse incidents across CRM, 1C, website and payment integrations and turn recurring ones into process changes

Middle System Analyst, [Lazerhouse](#)

Sep 2023 – Mar 2026

- Turned vague business requests into specified, prioritised development tasks
- Translated requirements between business stakeholders and developers in both directions
- Analysed incidents across CRM, 1C, website and payment integrations and documented each case

Technical Account Manager, [Lazerhouse](#)

Jul 2022 – Aug 2023

- Support and account management for the systems I later analysed
- Owned work accounts and service access, which later became the access-management process

Technical Support Manager, [Samsung Electronics Ukraine](#)

Mar 2020 – Jun 2022

- Diagnosed issues from vague user reports; escalated to developers with repro steps and impact
- Wrote troubleshooting guides from recurring cases, moving repeat issues to self-serve resolution
- Technical pre-sales and live-chat support for the online business unit
- Turned recurring issues and chat-quality patterns into feedback for scripts and materials

Skills

Analysis: Business analysis, System analysis, Requirements elicitation, User stories & acceptance criteria, BPMN, UML, Data modeling, Stakeholder management, Scrum, UAT

Tools: Jira, Confluence, REST APIs, Postman, SQL
